

Visoka škola strukovnih studija za informacione i
komunikacione tehnologije u Beogradu

Visoka ICT škola

Predmet: Praktikum iz PHP-a

Ime i prezime studenta: Jovana Ćirić

Broj indeksa: 110/21

Jun 2023, Beograd

Sadržaj:

1. Uvod

- 1.1. Korišćeni programski i markup jezici
- 1.2. Opis funkcionalnosti
- 1.3. Template

2. Organizacija

- 2.1. Organizaciona šema
- 2.2. Mapa sajta
- 2.3. Šema Baze Podataka
- 2.4. Organizacija Foldera

3. JS kod

4. Php Kod-Funkcionalnosti

1. Uvod

Sajt je rađen za predmet Praktikum iz PHP-a. Dizajn sajta je preuzet sa sajta: <https://www.free-css.com/free-css-templates/page284/pet-shop>, pa dodatno uređen.

1.1 Za potrebe sajta korišćene su sljedeće tehnologije:

HTML CSS + SCSS

Bootstrap + Font Awesome JavaScript + jQuery
XML(sitemap) Owl Carousel, Alertify,

PHP

Okruženje:

Visual Studio Code.

1.2 Opis funkcionalnosti

STRANICA “Home”

Pojava modala sa snimkom prilikom klika na “Play Video” dugme, dok dugme “Read More” vodi na ostatak stranice sa tekstom koji se smenjuje u zavisnosti od klika na dugme “Our Mission” ili “Our Vission”.

STRANICA "SERVICES"

Svi divovi sa tekстом uneti dinamički putem PHP-a, pomoću baze podataka.

Stranica “PRODUCTS”

Na gornjoj polovini stranice Products se dinamički prikazuju proizvodi koji su na Akciji, Bibliotekom Owl Carousel se stilizovala sekcija gde se omogućilo slajdovanje proizvoda levo-desno.

Na donjoj polovini stranice se prikazuju svi proizvodi, gde imamo mogućnost sortiranja po nazivu I ceni, opadajućem ili rastućem redosledu. Takođe je moguće filtriranje: Po kategoriji ili pretraživanju putem unosa teksta u polje za pretragu. Svaki filter I sort je sinhronizovan. Takođe postoji dugme “Clear All Filters” sa kojim se poništava svaki filter.

Svi podaci o proizvodu na ovoj stranici se nalaze u bazi podataka I prikazuju se dinamički putem JS-a. O svakom proizvodu je moguće pogledati više informacija klikom na ikonicu “Show More” koja se prikazuje prilikom hover-a na proizvod. Prilikom klika ukoliko niste ulogovani bićete redirektovani na stranicu login.php. U suprotnom naći ćete se na stranici details.php gde ćete videti više informacija o proizvodu I imati mogućnost da proizvod dodate u korpu. Uradjena je paginacija u zavisnosti od toga koliko proizvoda je prikazano po strani.

Stranica “Pricing Plan”

Na ovoj stranici se nalaze tri diva gde imamo različite pakete usluga koji Pet Shop nudi, svaki div je prikazan dinamički putem PHP-a, gde su korišćeni podaci iz baze podataka, Na donjoj sekciji stranice postoji test sa linkom ka stranici “Contact”.

Stranica “Autor”

Na ovoj stranici se nalazi fotografija, osnovni podaci o autoru sajta kao i link koji vodi ka portfolio autora.

Stranica “Contact”

Informacije koje postoje u bazi podataka fajlovima su unete dinamički. Na ovoj stranici korisnik može stupiti u kontak i poslati željenu poruku samo ukoliko je ulogovan, sa upisivanjem traženih informacija. Na ovoj stranici postoji validiranje unešenih podataka na klijentskoj i serverskoj strani i ukoliko neki od njih nije unet po pravilu korisniku izlazi poruka sa uputstvom o ispravnom unosu. Greške su obrađivane statusnim kodovima i

prikazuju se korisniku na prikladan način. Ukoliko je sve uneto kako treba korisniku ispod forme izlazi poruka:

“Thanks \$FullName, we will reach You as soon as possible!”

Gde FullName zamenjuje ime korisnika koje je uneto.

Poslata poruka se čuva u bazi i prikazuje na admin panelu.

Takođe ukoliko korisnik nije ulogovan prikazaće mu se informacije o sajtu kao i mapa, u suprotnom prikazuje mu se anketa. Ukoliko korisnik nije glasao prikazuje mu se pitanje i ponuđeni odgovori, a ako jeste pokazuju mu se rezultati glasanja.

Stranica “login.php”

Na stranici login.php korisnik se može registrovati ili ulogovati. Ukoliko korisnik nije registrovan a pokuša da se uloguje dobiće poruku o grešci da kredencijali ne postoje u bazi. Kada se korisnik registruje validacija podataka se vrši i na serverskoj i na klijentskoj strani. Ukoliko je registracija uspešno prošla korisnik dobija poruku da će mu pristići verifikacioni mail. Na email stiže poruka sa linkom na koji je potrebno da se klikne kako bi nalog postao verifikovan. Nakon toga korisnik je u mogućnosti da se uloguje. Ukoliko email već postoji u bazi, korisnik će dobiti poruku o tome. Ukoliko korisnik pokuša da se uloguje a prethodno nije verifikovao email, dobiće poruku da email nije verifikovan. Ukoliko se lozinka pogreši 3x korisniku se nalog blokira i dobija na mejl informaciju o tome. Greške su o bradivane statusnim kodovima i ispisane pomoću alertify biblioteke. Kada se korisnik uloguje, u zavisnosti od uloge koju ima, meni će se promeniti i dobiće funkciju za logout i pristup “cart” stranici ukoliko je uloga korisnik, odnosno za admin panel i logout ukoliko je uloga admin. Kada se korisnik izloguje meni se vraća u prvobitan oblik.

Stranica admin.php

Na ovoj stranici su dinamički preko PHP-a uz pomoć baze podataka ispisane tabele sa podacima o proizvodu, kategoriji, tipu, korisnicima, rezultatima ankete I poslatim porukama. Takođe postoji mogućnost za dodavanje novog, izmeni I brisanju postojećeg proizvoda. Za kategoriju I tip je omogućeno brisanje I dodavanje. Mogućnost brisanja korisnika, kao I odblokiranje istog. Imamo prikazanu statistiku pristupa stranicama na sajtu u prethodnih 24h, informacije se skladište u txt fajlu. Postoji I ispisan podatak o broju ulogovanih korisnika u prethodnih 24h.

Na svakoj od stranica je Meni i futer uneti dinamički putem PHP-a, gde se potrebni podaci učitavaju putem baze podataka. Na dnu stranice se nalazi Newsletter, gde postoji forma sa unosom email adrese koja takodje ima validaciju radi ispravnog unosa, ukoliko je adresa uneta ispravno ivice forme će postati zelene boje, ukoliko je uneta neispravno, ivice postaju crvene boje. Na svakoj od stranica prilikom skrola se pojavljuje strelica koja olakšava povratak na vrh strane. Prilikom logovanja meni se menja u zavisnosti od uloge. Takođe stranice imaju zaštićen pristup u zavisnosti od uloge i od toga da li je korisnik ulogovan.

Logout.php

Klikom na link logout, postojeći korisnik se izloguje odnosno brise iz sesije i ta sesija se unistava. I tako se korisnik odjavljuje sa sajta.

Stranica cart.php

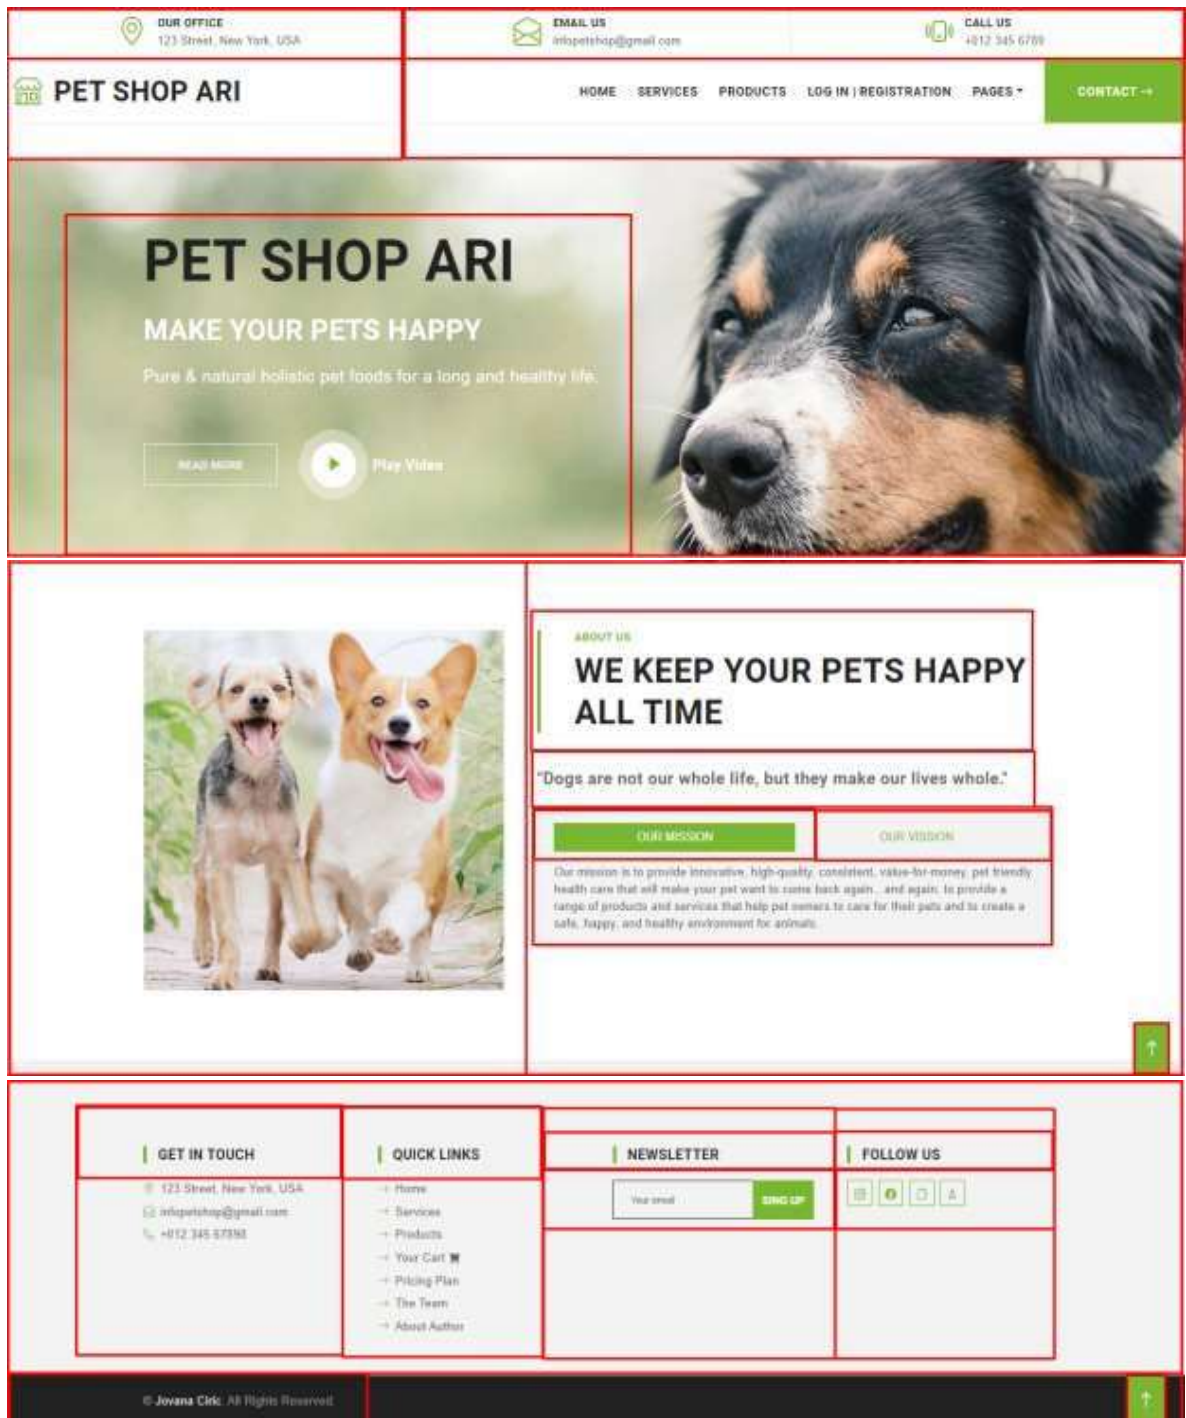

Ukoliko se nijedan proizvod ne nalazi u korpi na stranici se nalazi poruka da je korpa prazna. Ukoliko se neki od proizvoda nalazi u korpi, poruku zamenjuje tabela sa podacima o proizvodu, izračunatom ukupnom cenom svakog od proizvoda kao i konačna suma cele kupovine. Takođe postoje i dugmići:

1. "Remove" postoji pored svakog proizvoda i klikom na njega brisemo proizvod koji je označen.
2. "Clear Cart" nalazi se ispod tabele i klikom na njega brisemo sve proizvode iz tabele i pojavljuje se obavestjenje da je korpa prazna, dok tabela nestaje.
3. "Order" nalazi se ispod tabele i klikom na njega se brisu svi artikli iz tabele i korisniku izlazi poruka o uspešnom poručivanju i podacima porudzbine.

Svaka poruka je stilizovanja Alertify bibliotekom.

1.3 Template

Home.php

```
